

Azia

Bichon/Shih Tzu

DOB: 2004

Puppy Love Client since 2006

Aziz Rae (Aka "The Princess")

Azia was born on January 2, 2004 in Balzac, AB at Pooch Palace Kennels. She came in to our lives in April of that year and has been such an integral part of our family since that time.

When Azia was a puppy her zest for life was so evident through her play and desire to get in to everything that she could - chewing base boards, lying in wait for an unexpected attack and of course chewing the favorite pair of shoes in the closet were simply all a part of her very playful demeanor.

Since those early years, Azia has had a very complicated medical journey. At the age of 4 we found ourselves transporting her to a pet hospital in Calgary, intravenous & all, as she was experiencing serious issues with her intestine. Once in Calgary, they were able to help her but never determined what the root of the issue was & thus coined her "the miracle dog".

Shortly there after, Azia began displaying severe signs of allergies and has been on medication and specialty dog food every since. Most recently she was diagnosed with a heart disorder and a rare stomach disease- Gastric Pyloric Mucosal Hypertrophy - both occurring within the last year.

Despite the trial & tribulations with her medical make-up, we still see many signs of her youthful side. She looks forward to her walks, definitely loves her treats, has an extremely magnetic personality & is a dog who loves people. When we are at home, Azia is at our heels with every move that we make & is always cuddled up right by our side when resting or relaxing.

Family and friends often joke about how "high maintenance" Azia is, but we wouldn't want her any other way and so love and appreciate all that she has brought to our family dynamics!
